

Scatterplot Report

This work looks to be contributed to by several users early on before the 300 mark. You can note that there are several IDS/color swatches to indicate this. If I had to guess this would be maybe the start of the program or coding process. As time goes on contributions tend to fall off until we get to week 300. Around week 300 there is this odd vertical single contributor not quite sure what this could mean, maybe some sort of refactor, maybe some linting or updates. Then there is a long period of quiet and lastly this there seems to be a fix or update worked on by a couple of developers. This could be adding an update, or maybe a bug fix.
